# COVID-19 Roadmap

## The 12 Step Plan to Create a Totalitarian “New World Order”

DisidentSynthesis.org

1. Create a Problem

Take a flu-like illness with very common symptoms, that can be easily treated and a **99.97% recovery rate**. Essentially a **bad dose of seasonal flu**, but like the regular flu can be dangerous to people with weak immune systems or serious underlying health issues. Call it COVID-19.

2. Provoke a Terrified Reaction

Use the mainstream media to provoke massive fear. Ensure daily reporting of any death of someone “with” COVID as being a death “from” COVID. Report all “cases” even though **most people have no or mild symptoms**. Bribe scientists with grants and doctors with bonus payments for supporting testing and vaccinations.

3. Impose Lockdowns

Impose national and local lockdowns. Commence the “**Great Reset**” to **transfer wealth and power up to global corporations and the financial elite**: (1) Destroy small businesses; (2) Strengthen global corporations; (3) Cause a massive rise in State debt to international financiers; (4) Push cashless payments.

4. Exaggerate “Cases”

Use **totally unreliable PCR tests** to massively exaggerate the number of “cases” or so-called “infections” among healthy people who have no symptoms and cannot spread any infection.

5. Mandate Face Masks

Promote fear and to signal public compliance by mandating masks. In reality, cloth masks are **totally ineffective against any virus**. Prolonged use of masks actually increases health risks due to lack of oxygen, breathing in waste air and fungal infections.

6. Impose Contact Tracing

**Normalise surveillance**. Get people to accept having all of their personal movements and contact with people tracked, recorded and analysed.

7. Impose Health Passport ID systems

Introduce “health passport” apps for smartphones as a form of **biometric identity card** to monitor and control people’s freedom of movement and ability to access education, employment and all types of services. These will become a global digital identity system that will compulsory to go anywhere.

8. Rollout 5G Microwave Networks

5G networks allow constant gathering of huge amounts of personal data from smartphones and all internet connected devices. 5G massively increases the amount of high-frequency **microwave radiation** that can reduce blood oxygen levels and **trigger COVID-like respiratory symptoms**. 5G illnesses will be blamed on COVID to justify vaccinations.

9. Mandatory Vaccinations

Mandatory vaccination will generate **massive profits for Big Pharma corporations** who have **100% legal immunity** for all injuries and deaths. Vaccines will **destroy natural immunity**, increase **sterility rates** and promote **global depopulation**. New DNA and RNA vaccines will create **genetically modified humans** bioengineered for obedience, sterility and easy control.

10. Cashless Economy

Cash allows people to shop in privacy. With cash the State does not know what, where or when you buy something. A cashless economy means a **total loss of financial privacy** as all purchases can be constantly monitored and controlled. Access to digital finance can be withdrawn from anyone who dissents from officially approved purchases, views or behaviour.

11. Compel RFID Microchip Implants

Move from Health Passport apps to “more convenient” Radio Frequency Identity (RFID) **microchip implants** that allow **constant 24-7 monitoring of health, movements, contacts and digital payments**. With RFID chips, all human privacy will completely cease. Initially, these chips will be voluntary. Once normalised, they will become compulsory.

12. Arrive at the Totalitarian New World Order

A depopulated, **high-tech totalitarian world** with genetically modified humans, weakened natural immunity, micro-chipped, permanently connected to the internet, monitored and controlled 24-7. Human beings will be reduced to the level of “**biological machines**” living in a totalitarian prison. The real goal of this so-called “Great Reset” is **high-tech Fascism / Communism**. COVID is merely the excuse.

# Well, well, well...look at what the hell just surfaced

🔒 [nw-connection.com](http://nw-connection.com)

The *Virology Journal* – the official publication of Dr. Fauci's National Institutes of Health – published what is now a blockbuster article on August 22, 2005, under the heading – get ready for this – “Chloroquine is a potent inhibitor of SARS coronavirus infection and spread.” (Emphasis mine throughout.) Write the researchers, “We report...that chloroquine has strong antiviral effects on SARS-CoV infection of primate cells. These inhibitory effects are observed when the cells are treated with the drug either before or after exposure to the virus, suggesting both prophylactic and therapeutic advantage.”

This means, of course, that Dr. Fauci has known for 15 years that chloroquine and its even milder derivative hydroxychloroquine (HCQ) will not only treat a current case of coronavirus (“therapeutic”) but prevent future cases (“prophylactic”). **So HCQ functions as both a cure and a vaccine.** In other words, it's a wonder drug for coronavirus. Said Dr. Fauci's NIH in 2005, “concentrations of 10  $\mu\text{M}$  completely abolished SARS-CoV infection.” Fauci's researchers add, “chloroquine can effectively reduce the establishment of infection and spread of SARS-CoV.”

## ROADMAP FOR THE IMPLEMENTATION OF ACTIONS BY THE EUROPEAN COMMISSION BASED ON THE COMMISSION COMMUNICATION AND THE COUNCIL RECOMMENDATION ON STRENGTHENING COOPERATION AGAINST VACCINE PREVENTABLE DISEASES

ACTIONS	TIMELINES AND DELIVERABLES				
	2018	2019	2020	2021	2022
<p>Examine the feasibility of developing a <b>common vaccination card/passport for EU citizens</b> (that takes into account potentially different national vaccination schedules and), that is compatible with electronic Immunisation Information Systems and recognised for use across borders, without duplicating work at national level.</p> <p style="text-align: right;"><b>CR 16 and CC*</b></p>		<p>Feasibility study for the development of a common EU vaccination card</p>			<p>Commission proposal for a common vaccination card/passport for EU citizens</p>
<p>Produce on a regular basis a <b>Report on the State of Vaccine Confidence in the EU</b>, to monitor attitudes to vaccination. Based on that report and taking into account related work by WHO, present guidance that can support Member States in countering vaccine hesitancy.</p> <p style="text-align: right;"><b>CR 17 and CC</b></p>		<p>State of Vaccine Confidence in the EU 2020 Follow up of the study published in October 2018 <a href="https://ec.europa.eu/health/sites/health/files/vaccination/docs/2018_vaccine_confidence_en.pdf">https://ec.europa.eu/health/sites/health/files/vaccination/docs/2018_vaccine_confidence_en.pdf</a></p> <p>Guidance on countering vaccine hesitancy tailored to specific needs identified by the Member States and/or vaccine specific issues</p>			<p>Special Eurobarometer - Europeans' attitudes towards vaccination <a href="https://ec.europa.eu/commfrontoffice/publicopinion/index.cfm/survey/getsurveydetail/instruments/special/surveyky/2223">https://ec.europa.eu/commfrontoffice/publicopinion/index.cfm/survey/getsurveydetail/instruments/special/surveyky/2223</a></p>

\* Basis for action:

CR for Council Recommendation and the number of the Recommendation in the legal text. CC for Commission Communication

*This MANDATORY INJECTION was planned in  
2015 by the COVID RICO CONSPIRATORS*

*"...until an infectious disease crisis is very real, present, and at an emergency threshold, it is often largely ignored. To sustain the funding base beyond the crisis, he said, we need to increase public understanding of the need for MCMs such as a pan-influenza or pan-coronavirus vaccine. A key driver is the media, and the economics follow the hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of process, Daszak stated."*

2016 Feb 12. 6, *Developing MCMs for Coronaviruses*. Available from:  
<https://www.ncbi.nlm.nih.gov/books/NBK349040/>

In recognition of these limitations, the President signed the Executive Order on Modernizing Influenza Vaccines in the United States to Promote National Security and Public Health on **September 19, 2019**. Broadly, the Executive Order directs BARDA, CDC, NIH, and FDA to accelerate the adoption of improved influenza vaccine technologies. In alignment with the goals of the Executive Order, NIAID is conducting and supporting research to develop state-of-the-art vaccine platform technologies that could be used to develop universal influenza vaccines as well as to improve the speed and agility of the influenza vaccine manufacturing process. **These platform technologies include DNA, messenger RNA (mRNA), virus-like 5 particles, vector-based, and self-assembling nanoparticle vaccines.** For example, NIAID supported scientists are investigating an mRNA vaccine candidate that would allow for a more rapid and flexible response to both seasonal and pandemic influenza than do existing vaccine production strategies.

1. SARS-CoV-2 is an American-created recombinant bat vaccine, or its precursor virus. It was created by an EcoHealth Alliance program at the Wuhan Institute of Virology (WIV), as suggested by the reporting surrounding the lab leak hypothesis. The details of this program have been concealed since the pandemic began. These details can be found in the EcoHealth Alliance proposal response to the DARPA<sup>1</sup> PREEMPT<sup>11</sup> program Broad Agency Announcement (BAA) HR00118S0017, dated March 2018<sup>11</sup> - a document not yet publicly disclosed.

ARLINGTON, VA 22203-2114

2. SARS-CoV-2, hereafter referred to as SARSr-CoV-WIV, is a synthetic spike protein chimera engineered to attach to human ACE2 receptors and

inserted into a recombinant bat SARSr-CoV backbone. It is likely a live vaccine not yet engineered to a more attenuated state that the program sought to create with its final version. It leaked and spread rapidly because it was aerosolized so it could efficiently infect bats in caves, but it was not ready to infect bats yet, which is why it does not appear to infect bats. The reason the disease is so confusing is because it is less a virus than it is engineered spike proteins hitch-hiking a ride on a SARSr-CoV quasispecies swarm. The closer it is to the final live attenuated vaccine form, the more likely that it has been deattenuating since initial escape in August 2019.

UNCLASSIFIED  
DEFENSE ADVANCED RESEARCH PROJECTS AGENCY

ARLINGTON, VA 22203-2114

The gene-encoded, or "mRNA," vaccines work poorly because they are synthetic replications of the already-synthetic SARSr-CoV-WIV spike proteins and possess no other epitopes. The mRNA instructs the cells to produce synthetic copies of the SARSr-CoV-WIV synthetic spike protein directly into the bloodstream, wherein they spread and produce the same ACE2 immune storm that the recombinant vaccine does. Many doctors in the country have identified that the symptoms of vaccine reactions mirror the symptoms of the disease, which corroborates with the similar synthetic nature and function of the respective spike proteins. The vaccine recipient has no defense against the bloodstream entry, but their nose protects them from the recombinant spike protein quasispecies during "natural infection" (better termed as aerosolized inoculation).

The recipient has no defense against the bloodstream entry, but their nose protects them from the recombinant spike protein quasispecies during "natural infection" (better termed as aerosolized inoculation).

## It's just...

It's just a mask.

It's just 2 metres.

It's just 3 weeks.

It's just non-essential businesses.

It's just non-essential workers.

It's just 3 more weeks.

It's just until we work it out.

It's just a bar.

It's just a restaurant.

It's just care homes.

It's just schools.

It's just to keep from overwhelming the NHS.

It's just until the cases go down.

It's just to flatten the curve.

It's just to keep others from being scared.

It's just for a few more weeks.

It's just gyms, and salons, and spas, and sport.

It's just churches and mosques.

It's just singing.

It's just no happy birthday; no shared cakes.

It's just travel.

It's just 3 months of lockdown.

It's just some floor markings, and temporary screens.

It's just a one way system.

It's just until we get a vaccine.

It's just an app.

It's just for tracing.

It's just to let people know you're safe to be around.

It's just to let others know who you've been in contact with

It's just a few more months.

It's just some areas.

It's just government guidelines.

It's just for your own good.

It's just for protecting others.

It's just fact-checking; it's not censorship.

It's just mandatory.

It's just... it's the law now.

It's just 'the science is settled'.

It's just only those scientists, not those ones.

It's just because of the second wave.

It's just to save your granny.

It's just an app.

It's just for tracing.

It's just to let people know you're safe to be around.

It's just to let others know who you've been in contact with.

It's just a few more months.

It's just some areas.

It's just government guidelines.

It's just for your own good.

It's just fact-checking; it's not censorship.

It's just mandatory.

It's just... it's the law now.

It's just 'the science is settled'.

It's just only those scientists, not those ones.

It's just because of the second wave.

It's just to save your granny.

It's just an app.

It's just another lockdown.

It's just 4 more weeks.

It's just Christmas, cancelled.

It's just school; they can do it from home.

It's just almost a year... but after a year it will be better.

It's just a swab.

It's just for medical information.

It's just a jab.

It's just a badge; get a lanyard.

It's just a card to store your medical history.

It's just so you can travel.

It's just for your passport.

It's just so you can go into stores, and pubs.

It's just so you can send your kids to school.

It's just so you can get your driver's license.

It's just so you can vote.

It's just so you can go to a concert.

It's just a facility, to keep you separate from the others.

It's just a few more years.

It's just for those people.

It's just for the ones who didn't care.

It's just better we keep it this way.

## It's. Not. Just...

Absquatulate - Gab: @Absquat...  
@airstripone84

The mRNA 'vaccine' they're giving you isn't 'new', it's just a tweaked version of a gene therapy treatment that could never get licensed due to safety issues, because it killed the animals it was tested on. You're taking part in the biggest medical experiment in history.

10:05 AM · 2/6/21 · Twitter Web App

“Gene based vaccines have NEVER been used on humans before, so what we’re witnessing now are human experiments”

– *Sucharit Bhakdi*  
(*The most cited microbiologist in German academic history*)

## PFIZER-BIONTECH COVID-19 VACCINE:

### Short-Term Efficacy & Safety Data

Available in other languages at  
[physiciansforinformedconsent.org/covid-19-vaccine](https://physiciansforinformedconsent.org/covid-19-vaccine)

#### 1. WHAT IS THE PFIZER-BIONTECH COVID-19 VACCINE?

The Pfizer-BioNTech COVID-19 vaccine is made from synthetic genetic material that is immersed in fatty substances, including cholesterol and polyethylene glycol (PEG). More specifically, modified RNA molecules that encode for a mutated spike (S) protein antigen of the SARS-CoV-2 virus, the virus that can cause COVID-19, are immersed in lipid nanoparticles. The drug is administered in two intramuscular doses, 21 days apart.<sup>1</sup>

#### 2. HOW WAS THE VACCINE STUDIED PRIOR TO OBTAINING EUA?

The Pfizer-BioNTech COVID-19 vaccine has obtained emergency use authorization (EUA) from the U.S. Food and Drug Administration (FDA) and is currently investigational.<sup>1</sup> The vaccine was studied through nonclinical data from rats and nonhuman primates, and clinical data from humans. The EUA was based on a human clinical trial comparing approximately 22,000 subjects who received the vaccine with 22,000 subjects who did not receive the vaccine (Table 1).<sup>2</sup> The trial included a median observation period of two months; 50.6% of subjects were followed up for about two months after the second dose.<sup>2</sup> The FDA states that due to the length of the clinical trial's observation period, "it is not possible to assess sustained efficacy over a period longer than 2 months."<sup>2</sup>

#### 3. HOW EFFECTIVE IS THE VACCINE IN ADULTS AND THE ELDERLY?

Vaccine effectiveness was calculated by observing the number of cases in the vaccinated group versus the number of cases in the unvaccinated group, where a COVID-19 case was defined as the presence of at least one COVID-19 symptom and a positive SARS-CoV-2 test at least seven days after the second dose. In subjects 18 to 64 years old, the vaccine was 89–98% effective over a two-month observation period.<sup>2</sup> However, since there were only 15 COVID-19 cases observed in subjects 65 to 74 years old and only five cases in subjects 75 years or older, the clinical trial did not have enough statistical power to accurately measure the vaccine's effectiveness in those age groups. The vaccine may be only 53% effective in subjects 65 to 74 years old and 0% effective in subjects 75 years or older.<sup>2</sup> See Table 1. Subjects 65

In subjects 65 to 74 years old, the vaccine may be only 53% effective, and in subjects 75 years or older, the vaccine may be 0% effective.<sup>2</sup> People 65 years or older comprise about 80% of all COVID-19 deaths.<sup>4</sup>

years or older comprise about 80% of all COVID-19 deaths, and subjects 75 years or older comprise about 60% of all COVID-19 deaths.<sup>4</sup>

#### 4. IS THE VACCINE EFFECTIVE IN CHILDREN?

Safety and efficacy data was either not tested or insufficient in children younger than 16 years old. In addition, since there was only one case of COVID-19 in subjects 16-17 years old, the study did not have enough statistical power to measure effectiveness in that age group.<sup>2</sup> See Table 1.

#### 5. DOES THE VACCINE PREVENT HOSPITALIZATIONS AND DEATHS?

Since only two hospitalized cases of COVID-19 were observed, the clinical trial did not have enough statistical power to measure the vaccine's ability to prevent hospitalizations from COVID-19.<sup>2</sup> See Table 1. The FDA states, "A larger number of individuals at high risk of COVID-19 and higher attack rates would be needed to confirm efficacy of the vaccine against mortality."<sup>2</sup>

SHORT-TERM EFFICACY DATA			
Enrolled subjects	22,000 vaccinated for COVID-19	22,000 unvaccinated for COVID-19	Efficacy % approx. 2-month observation period
Confirmed COVID-19 (age 18–64) <sup>2</sup>	8	149	89–98
Confirmed COVID-19 (age 65–74) <sup>2</sup>	1	14	53–55
Confirmed COVID-19 (age 75 and older) <sup>2</sup>	0	5	Insufficient data
Confirmed COVID-19 (age 16–17) <sup>2</sup>	0	1	Insufficient data
Confirmed COVID-19 hospitalizations <sup>2</sup>	0	2	Insufficient data
Asymptomatic SARS-CoV-2 infection <sup>2</sup>	Not tested	Not tested	Not tested
SARS-CoV-2 spread (transmission) <sup>2</sup>	Not tested	Not tested	Not tested
SHORT-TERM SAFETY DATA			
Severe adverse events <sup>1</sup>	240 (0.1%)	139 (0.6%)	2x risk in vaccine group
Suspected COVID-19 (within 7 days of exposure) <sup>2</sup>	1,554 (45%)	1,616 (38%)	?
Pregnant/breastfeeding <sup>2</sup>	Insufficient Data	?	?
Immunocompromised <sup>2</sup>	Insufficient Data	?	?
Subjects age 16–34 <sup>2</sup>	Insufficient Data	?	?
Children age 12–15 <sup>2</sup>	Insufficient Data	?	?
Children younger than 12 <sup>2</sup>	Not Tested	?	?
Not tested	Insufficient data to prove efficacy or safety	Evidence of short-term benefit	Evidence of risk

Table 1: Short-term efficacy and safety data from the Pfizer/BioNTech COVID-19 vaccine clinical trial.

#### 6. IS THE VACCINE EFFECTIVE IN PREVENTING INFECTION WITH SARS-COV-2 OR THE SPREAD OF COVID-19?

The Pfizer clinical trial was not designed to observe asymptomatic infection with SARS-CoV-2 or the effect of the vaccine on the spread (transmission) of COVID-19. Consequently, the FDA states that "it is possible that asymptomatic infections may not be prevented as effectively as symptomatic infections" and "data are limited to assess the effect of the vaccine against transmission of SARS-CoV-2 from individuals who are infected despite vaccination." Furthermore, "additional evaluations including data from clinical trials and from vaccine use post-authorization will be needed to assess the effect of the vaccine in preventing virus shedding and transmission, in particular in individuals with asymptomatic infection."<sup>1</sup> Approximately 40% of SARS-CoV-2 infections are asymptomatic.<sup>5</sup>

As all subjects were observed for only two months, the long-term efficacy and safety of the vaccine for any age group is not known.

#### 7. WHAT IS THE RISK OF A SEVERE SIDE EFFECT FROM THE VACCINE?

The Pfizer COVID-19 vaccine clinical trial found the overall incidence of severe adverse events during the two-month observation period to be 1.1% in the vaccinated group and 0.6% in the unvaccinated group, resulting in a vaccine risk of 0.5% or 1 in 200 vaccinated subjects.<sup>2</sup> See Table 1. Consequently, subjects who received the vaccine had nearly double the risk of a severe adverse event occurring in the two-month observation period compared to subjects who did not receive the vaccine. A severe adverse event was defined as that "interferes significantly with participant's usual function."<sup>6</sup>

Of note, approximately 3,400 or 8% of all subjects experienced "suspected COVID-19" because they had symptoms but tested negative for SARS-CoV-2; two of these cases required hospitalization, both of which were in the vaccinated group. These cases could represent false negatives, other influenza-like illness, and adverse events; 409 such cases occurred in the vaccinated group within seven days of injection whereas 287 such cases occurred in the unvaccinated group in the same time period. See Table 1. Only the cases that were reported as serious were recorded as adverse events.<sup>2</sup> It is not clear why there were 20 times more suspected COVID-19 cases than confirmed COVID-19 cases.

After emergency use authorization for the Pfizer COVID-19 vaccine was obtained and mass vaccination began, the Centers for Disease Control and Prevention (CDC) recorded about 5,000 "health impact events" among 215,000 vaccinated subjects (1 in 43) that, similar to the definition of severe adverse events in the clinical trial, prevented the ability to perform normal daily activities, including work, and required medical attention.<sup>7</sup>

Additionally, as there were only 11,600 subjects in the 16- to 55-year-old age group who received the vaccine,<sup>2</sup> and since as of Feb. 2, 2021, about 1 in 31,000 people 15–34 years of age contracted a fatal case of COVID-19 in the U.S.,<sup>8</sup> the clinical trial does not have sufficient data to determine safety in subjects who are 15–34 years of age. Per the FDA, "There are currently insufficient data to make conclusions about the safety of the vaccine in subpopulations such as children less than 16 years of age, pregnant and lactating individuals, and immunocompromised individuals."<sup>9</sup> And, because all subjects were observed for only two months, the long-term safety of the vaccine for any age group is not known.

- Pfizer recorded almost 2x more severe adverse events (1 in 200) in the vaccinated group than the unvaccinated group.<sup>2</sup>
- The CDC recorded severe side effects about 1 in 43 vaccinated subjects.<sup>7</sup>

#### 8. IS THE COVID-19 VACCINE EFFECTIVE AND SAFER THAN COVID-19?

The extent to which the Pfizer-BioNTech COVID-19 vaccine is effective and safer than COVID-19 is not known. The clinical trial indicates that in subjects 65 to 74 years old, the vaccine may be only 53% effective, and in subjects 75 years or older, the age group that comprises about 60% of all COVID-19 deaths, the vaccine may be 0% effective; also, in children age 16-17 the vaccine may not be effective. The clinical trial did not have enough statistical power to measure the vaccine's ability to prevent hospitalizations and deaths, and the trial did not assess if the vaccine prevents asymptomatic infection or spread (transmission) of the virus.

Severe adverse events from the vaccine occurred in 1 in 200 subjects in the Pfizer clinical trial. The CDC has recorded that 1 in 43 vaccinated subjects was unable to perform normal daily activities and required medical attention. Furthermore, for people 15–34 years of age, the clinical trial did not include enough subjects to be able to show that the vaccine is safer than the disease, and because the clinical trial observation period lasted only two months, the incidence of long-term side effects from the vaccine for any age group is not known.

All references are available at [physiciansforinformedconsent.org/covid-19-vaccine](https://physiciansforinformedconsent.org/covid-19-vaccine).

These statements are intended for informational purposes only and should not be construed as personal medical advice.

89,000 doctors and nurses in Holland have refused the vaccine.

60% of all nurses in America are refusing the vaccine.

Around one third of the nurses and care staff in the UK are refusing the vaccine.

Norway, Switzerland and other countries have stopped giving vaccines to over 65s after massive amounts of deaths in care homes until more research is done.

120,000 doctors and nurses from the World Doctors Alliance are refusing the vaccine and telling us not to take it but you sheep just listen to your government and listen to the media and take it you know best. 👍

## Pfizer CEO's Israel visit canceled because he is not fully vaccinated

Bourla said in December that he has not yet received the vaccine yet because he does not want to "cut in line."

By JERUSALEM POST STAFF MARCH 7, 2021 00:39

Pfizer CEO Albert Bourla introduces US President Joe Biden as the president toured a Pfizer manufacturing plant producing the coronavirus disease (COVID-19) vaccine in Kalamazoo, Michigan, US, February 19, 2021.

(photo credit: REUTERS/TOM BRENNER)

# How To Legally Decline A Vaccine

## STEP 1.)

**DO NOT** 'refuse' a vaccine. Otherwise you will be considered belligerent. Instead you can politely decline the service by doing the following:

## STEP 2.)

Ask the doctor, "**Does the vaccine have MRC-5 in it?**" (THEY ALL DO)  
These are aborted fetal cells and other DNA.  
If the vaccine contains MRC-5 you have the RIGHT to decline.

## STEP 3.)

Also ask, "**Is there a possibility of a "LATROGENIC REACTION?"**  
(an adverse reaction caused by multiple compounds or drugs interacting with each other) from the vaccine (THEY ALL DO).  
- When the doctor says, "yes it does," that is your "Get Out Of Vaccine Free Card." Thank the doctor for their offer and walk away.

**Remember** doctors have sworn the Hippocratic Oath (Which is to do no harm) They must honour it.  
This is how we can **legally (and respectfully)** decline their offered mandated services and there is absolutely nothing they can do about it. Now you know!

**PLEASE SHARE WITH EVERYONE YOU CARE ABOUT!**

## About the Red Cross

### to donate

### About domestic disaster relief

### About international activities

### About blood donation

Those who have been vaccinated with inactivated vaccines such as influenza, Japanese encephalitis, cholera, hepatitis A, pneumococcus, pertussis, tetanus, and toxoid are not allowed to donate blood for 24 hours after vaccination.

Those who received hepatitis B vaccine 2 weeks after vaccination, those who received anti-HBs human immunoglobulin alone or in combination for 6 months after administration, those who received rabies vaccine (after being bitten by an animal) Please refrain from donating blood for one year after vaccination.

Those who received live attenuated vaccines such as mumps, rash, and BCG received antisera of tetanus, serpentine, gas, and botulinum for 4 weeks after vaccination and for 2 months after vaccination with smallpox vaccine. Please refrain from donating blood for 3 months after administration.

Those who have been vaccinated with the new coronavirus are not allowed to donate blood for the time being.

# CHOOSING YOUR COVID-19 VACCINE

## FACTS YOU NEED TO KNOW

**Pfizer:** \$4.7 billion in fines for false claims, drug and medical equipment safety violations, off-label promotion, corrupt practices, kickbacks, and bribery.

**Moderna:** Has never brought a vaccine to market since its founding, despite fielding 9+ vaccine candidates, none of which made it through phase 3 clinical trials.

Johnson & Johnson

**Johnson & Johnson:** Named in hundreds of thousands of lawsuits for toxic and/or dangerous products, including drugs, shampoos, medical equipment, and asbestos-contaminated baby powder.

**AstraZeneca:** Suspended by two dozen European countries due to severe, lethal adverse reactions, like blood clots.

## Don't worry, you're in safe hands!

If you're vaccinated, remember to wear a mask and socially distance because you can still spread COVID-19. Trust The Science™

## Search Results

From the 5/21/2021 release of VAERS data:

**Found 262,521 cases where Vaccine is COVID19**

Table

Event Outcome	Count	Percent
Death	4,406	1.68%
Permanent Disability	3,299	1.26%
Office Visit	45,004	17.14%
Emergency Room	40	0.02%
Emergency Doctor/Room	34,435	13.12%
Hospitalized	14,949	5.69%
Hospitalized, Prolonged	37	0.01%
Recovered	100,406	38.25%
Birth Defect	142	0.05%
Life Threatening	4,590	1.75%
Not Serious	103,639	39.48%
<b>TOTAL</b>	<b>↑ 310,947</b>	<b>↑ 118.45%</b>

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 262521 (the number of cases found), and the Total Percentage is greater than 100.

This week's data showed **3,449** total adverse events, compared with **943 reports last week**, among 12- to 17-year-olds. This week's data included **58** reports of serious adverse events in the 12- to -17-year-old age group.

## Pfizer CEO: 'Every Year You Will Have to Get Your Annual Shot for COVID'

*Pfizer said this week it's begun testing a third dose of its COVID vaccine and a new modified version to address variants for years to come.*

By [Megan Redshaw, J.D.](#)

21

@SAMMYFRITH9  
A HEALTHY HUMAN

# The Spike Protein is the reason why the vaccines might kill you

It normally takes over 10 years to make a new vaccine - This vaccine has been rushed.

No matter what you have been told there's no way they could have done all the tests they normally do in 10+ years in just a few months. Including waiting 9 months to see if children born to vaccinated parents are healthy.

The COVID-19 Virus is covered in Spikes - called "The Spike Protein". The new mRNA Vaccines get your body to produce millions of these "Spikes". There is no OFF button, once you are injected there's no telling when the body will stop making the Spikes.

The latest studies show that upto 75% of the vaccine leaves the injection site and travels in the blood all over the body. Potentially ending up in your ovaries, heart, brain and even bone marrow, which could lead to Blood Cancer (Leukaemia).

These "Spikes" are like having millions of tiny daggers inside your body. Many people have died from blood clots caused by the vaccines.

When they tested previous mRNA Vaccines in animals. The animals seemed fine at first. But when they were exposed to the real virus, their bodies over-reacted and they died.

Many people that died from COVID - died because their bodies over-reacted to the virus (this is called the cytokine storm) - Taking Vitamin D regularly (at least 4,000iu per day) will help prevent this over-reaction.

Flu season always occurs in winter when people cannot make enough Vitamin D from the sun. Taking Vitamin D is the easiest way to help reduce sickness from Flu / COVID.

Taking Vitamin D will also help reduce joint and back pain in as little as 2 weeks (take at least 4,000iu per day). As well as reduce your chances of getting Cancer, Heart Disease, Diabetes, Multiple Sclerosis and many other medical conditions. If more people took Vitamin D the medical companies would lose Billions in lost revenue.

## Trust The Scientists

How many times have you heard the phrase "Trust The Scientists" but never seen anyone's name mentioned. Below are several Doctors & Scientists that warn against the vaccines.

**Dr. Robert Malone - Inventor of the mRNA Technology** - in June 2021 made a 3 hour video in which he says in great detail why the COVID vaccine is so dangerous

**Dr. Michael Yeadon** - Worked for Pfizer for 16+ years reaching the position of Vice President says these vaccines are dangerous

**Dr. Geert Vanden Bossche** - Worked in the vaccine industry his entire career says injecting millions of people during an ongoing pandemic is dangerous

**Professor Dolores Cahill** - from University College Dublin School of Medicine - Expects those that get injected to start dying or getting very sick within the next few years.

## More Doctors that have spoken up about the dangers of the vaccines you can look up

Dr. Roger Hodkinson, Dr Byram Bridle, Dr. Peter McCullough, Dr. Zev Zelenko, Dr. Carrie Madej, Dr. Sherri Tenpenny, Dr. Stephanie Seneff, Dr. Lee Merritt, Dr Vernon Coleman, Professor Sucharit Bhakdi

## More Information

Telegram is one of the few places you can find uncensored information and many videos about COVID vaccine safety which YouTube removes.

## VACCINE DEFINITION IN OCTOBER 2019

web.archive.org/web/20191013020123/https://www.merriam-webster.com/dictionary/vaccine

SEP OCT MAY  
13  
2018 2019 2020

Merriam-Webster

DICTIONARY THESAURUS

### vaccine noun

vac·cine | \vak-'sēn, 'vak-,sēn\

#### Definition of vaccine

: a preparation of killed microorganisms, living attenuated organisms, or living fully virulent organisms that is administered to produce or artificially increase immunity to a particular disease

## VACCINE DEFINITION AFTER COVID

Merriam-Webster SINCE 1828

vac·cine

Dictionary Thesaurus

### vaccine noun

Save Word

vac·cine | \vak-'sēn, 'vak-,sēn\  
plural **vaccines**

#### Definition of vaccine

**1** : a preparation that is administered (as by injection) to stimulate the body's immune response against a specific infectious agent or disease: such as

- a** : an antigenic preparation of a typically inactivated or attenuated (see ATTENUATED sense 2) pathogenic agent (such as a bacterium or virus) or one of its components or products (such as a protein or toxin)  
*// a trivalent influenza vaccine*  
*// oral polio vaccine*  
*// Many vaccines are made from the virus itself, either weakened or killed, which will induce antibodies to bind and kill a live virus. Measles vaccines are just that, weakened (or attenuated) measles viruses.*  
— Ann Finkbeiner et al.  
*// ... a tetanus toxoid-containing vaccine might be recommended for wound management in a pregnant woman if [greater than or equal to] 5 years have elapsed ...*  
— Mark Sawyer et al.  
*// In addition the subunit used in a vaccine must be carefully chosen, because not all components of a pathogen represent beneficial immunological targets.*  
— Thomas J. Matthews and Dani P. Bolognesi
- b** : a preparation of genetic material (such as a strand of synthesized messenger RNA) that is used by the cells of the body to produce an antigenic substance (such as a fragment of virus spike protein)  
*// ... Moderna's coronavirus vaccine ... works by injecting a small piece of mRNA from the coronavirus that codes for the virus' spike protein. ... mRNA vaccine spurs the body to produce the spike protein internally. That, in turn, triggers an immune response.*  
— Susie Neilson et al.  
*// The revolutionary messenger RNA vaccines that are now available have been over a decade in development. ... Messenger RNA enters the cell cytoplasm and produces protein from the spike of the Covid-19 virus.*  
— Thomas F. Cozza  
*// Viral vector vaccines, another recent type of vaccine, are similar to DNA and RNA vaccines, but the virus's genetic information is housed in an attenuated virus (unrelated to the disease-causing virus) that helps to promote host cell fusion and entry.*  
— Priya Kaur  
NOTE: Vaccines may contain adjuvants (such as aluminum hydroxide) designed to enhance the strength and duration of the body's immune response.

**2** : a preparation or immunotherapy that is used to stimulate the body's immune response against noninfectious substances, agents, or diseases  
*// The U.S. Army is also testing a ricin vaccine and has reported success in mice.*  
— Sue Goetnick Ambrose  
*// ... many of the most promising new cancer vaccines use dendritic cells to train the immune system to recognize tumor cells.*  
— Patrick Barry

paragraph. >>>

## Operation Lockstep: From The Rockefeller Playbook

**1st Phase:** Common cold/Flu. Mild symptoms at most. Media endorsement of mass paranoia and fear. Flawed testing system utilized, which picks up any genetic material in the body and triggers a positive result. Inflation of Covid case numbers, through changing of death certificates, double-counting and classifying all deaths including other diseases and natural causes as Covid-19. Lockdown will condition us to live under Draconian laws, prevent protests and identify public resistance.

**2nd Phase:** The 1st phase will lead to compromised and frail immune systems through lack of food, social distancing, wearing masks and lack of contact with sunlight and healthy bacteria. Exposure to 5G radiation will further attack the immune system. Thus, when people re-emerge into society, more people will fall ill. This will be blamed on Covid-19. This will all occur before the vaccination is ready to justify it. A longer and more potent lockdown will follow until everyone takes the vaccine.

**3rd Phase:** If majority of people resist the vaccine, a weaponized SARS/HIV/MERS virus will be released. A lot of people will die from this. It will be survival of the fittest. It will also be the ultimate push for everyone to be vaccinated in order to return to normality. Those who have taken the vaccine will be at war with those who have not. It will be anarchy from all sides.

The CNGB is funded by the CCP, WHO, pharma, and Bill Gates. The CNGB in Shenzhen, CN is the world's largest DNA databank. BGI-operated CNGB is an official partner of the GISAID initiative.

**China National Gene Bank (CNGB Overview)**

- Non-profit organization
- Public-Private Partnership (PPP)
- Jointed funded by State Government, Shenzhen Municipal government and BGI
- Operated by BGI Research

**Objectives:**

- Act as a platform for integrating genetic resources and capabilities.
- Use best technologies, experience and testing of new genome technologies.
- Support the development of the IT in the industry and the economy in China.
- Establish international connections and influence in global genome community.

**GISAID**  
**GISAID EpiCoV™ Database**

Launched in 2008 (2011-2015) by the Institute of Genome Sciences and Policy (IGSP) at Johns Hopkins University. GISAID is the official partner of the GISAID Initiative. It provides access to GISAID user accounts. It has been recognized as the first government to support the creation of the GISAID Initiative, by providing since 2007 technical guidance, public funding as well as substantial in-kind contributions for the ongoing development of the EpiCoV™ database application and GISAID's educational programs.

**United States of America**

The United States Department of Health and Human Services, through its Centers for Disease Control and Prevention (CDC) is the first government to support the creation of the GISAID Initiative, by providing since 2007 technical guidance, public funding as well as substantial in-kind contributions for the ongoing development of the EpiCoV™ database application and GISAID's educational programs.

Americans get COVID-19 data from the CDC. The CDC gets COVID-19 data from the NIH and GISAID. The NIH and GISAID both get COVID-19 data from the CNGB.

**Public genome repositories for SARS-CoV-2**

**COVID-19 Genomic Epidemiology Toolkit: Module 3.5**

Michael Weigand, PhD  
Bioinformatics  
Centers for Disease Control and Prevention

**Rationale for sequencing SARS-CoV-2**

- State/local level
  - Supplement control efforts
  - Better understand epidemiology
- National level
  - Scale surveillance
  - Guide diagnostics, vaccine, and therapeutic development
- Collecting sequences in public databases strengthens both
  - Submission should be included in any SARS-CoV-2 sequencing workflow
  - More valuable if clinical, epidemiological metadata included

**Public repositories for SARS-CoV-2 genomic data**

- 1. GISAID** (Global Initiative on Sharing All Influenza Data)
  - Facilitates rapid sharing of data from influenza (A/B) and SARS-CoV-2 (B) genes
  - www.gisaid.org
- 2. NCBI/NIH** (National Center for Biotechnology Information)
  - 10 National Institutes of Health (NIH)
  - GenBank™, Sequence Read Archive (SRA), Pubmed, Bioproject, etc.
  - facilitates public access and rapid sharing of SARS-CoV-2 sequences
  - Integrates SARS-CoV-2 data with literature (PubMed/Medline) and the BiGSTP database
  - www.ncbi.nlm.nih.gov

• Different submission standards, organizations, primary users  
• Both provide appropriate collection of genomic data and epidemiological metadata.

**Summary**

- Public repositories facilitate organized, open data sharing
- Maximize utility of SARS-CoV-2 genome sequence data
- Support resources like public notification-buils
- Query, download sequences to supplement local analysis or investigation

**GISAID** National Library of Medicine  
National Center for Biotechnology Information

**Pay it forward**

- Submitting your data to **BGI** repositories can help others!
- Better with clinical, epidemiological metadata (PHARGE)

In 2016, the University of Washington in Seattle and Washington State University both signed MOUs with BGI-Group to advance biomedical research in China.

**WASHINGTON STATE UNIVERSITY**

**WSU Signs MOU with BGI**

SHENZHEN, China – Washington State University and BGI signed a Memorandum of Understanding regarding basic and applied research in agriculture. Wednesday. The MOU was signed by WSU Vice President for International Programs Asif Chaudhry and Dr. Huangming Yang, Chairman of BGI.

**BGI** myBGI Change region

- In 2016, BGI expanded its presence in North America with a new office in Seattle, supporting partnerships with universities, companies and health-related organizations, including the Bill & Melinda Gates Foundation and the University of Washington. In 2017 BGI opened a Global Innovation Center in Seattle and San Jose to build an ecosystem of innovation in the two high-technology clusters and promote cross-sector collaboration.

In January of 2017, the Gates family and the Bill and Melinda Gates Foundation had already donated more than 1.25 billion dollars to the University of Washington in Seattle.

**\$1.25 billion from the Billionaires in the backyard**

Over the past two decades, the Gates family and the Bill & Melinda Gates Foundation have donated 1.25 billion to the University of Washington. That adds to the nearly \$1.9 billion, 122 million shares of stock donated to the UW in 2004 (see <http://www.washington.edu/news/2017/01/04/gates-foundation-donates-125-million-to-u-w/>).

"They're calling me up saying, 'I need masks!' Glimmerstein remembered. "I said, 'I can make some phone calls, I'll call the factory and I'll get them for you.'"

It was then that he leveraged a connection with an acquaintance in China – a man he said is "three personal friends with the CEO of the Chinese company, BGI."

"I have some very powerful friends in the industry," Glimmerstein said.

In addition to masks, he said the man worked to secure for him COVID-19 tests from Shenzhen-based BGI Group, which calls itself the "world's largest genome research organization."

The U.S. government calls it a privately owned company that sits at the center of China's gene research industry and "has evident links to the government."

**These four words are helping spread vaccine misinformation**  
 By Ramishah Maruf, CNN Business  
 Updated 3:23 PM ET, Sun September 19, 2021

(CNN) – Four little words — "do your own research" — are hurting the US pandemic response, CNN's chief media correspondent Brian Stelter said on "Reliable Sources" Sunday. And it is having real consequences as personalities from Nicki Minaj to Sean Hannity continue to promote the idea.

Minaj helped raise doubts about Covid-19 vaccines on Twitter last week, claiming she would only get the shots once she'd "done enough research." It may seem like a reasonable, even positive, attitude, and it is a favored talking point echoed by many in the right-wing media.

The problem is that most people simply

**BUT THEY'RE TELLING THE TRUTH ABOUT COVID-19?**

# A new world

Tedros Adhanom Ghebreyesus

**T**he COVID-19 pandemic is changing the fabric of our societies. The question is whether countries can pull together in their research on vaccines, diagnostics and therapeutics, or whether misguided nationalism will prevail

## A new world

Share

Since the beginning of the pandemic, much attention has been given – rightly – to accelerating the development of vaccines, diagnostics and therapeutics. Advances in biology, science and technology have propelled this work. No disease in history has benefited from such rapid research.

But the greatest test we face now is not scientific or technical. It is a test of character. Can countries come together in solidarity to share the fruits of research? Or will misguided nationalism reinforce the inequalities and injustices that have blighted our world for too long?

The US pharmaceutical industry has raised drug prices some 1,186 times this year, according to Patients for Affordable Drugs, an advocacy group seeking to rein in the sky-high cost of prescription drugs. The group published their analysis on Wednesday.

Despite record profits, pharmaceutical companies jacked up the prices on 133 products between June 24 and July 5 alone, the group found, noting that the median price increase for 2022 was 5%. In July alone, 64 drug companies hiked their prices, according to Patients for Affordable Drugs.

Companies like Pfizer, who have made unprecedented profits on their Covid-19 vaccine, have nevertheless continued increasing their prices on other drugs. Pfizer's leukemia medicine, Besponsa, for example, has seen four price hikes since the pandemic began and now retails at \$21,056 for a single vial.

But why would Anthony Fauci suppress effective treatments? Why attack doctors trying to find a solution? According to Robert Kennedy, it might be because safe and effective treatments for COVID-19 would make the new vaccines unnecessary.

Successful treatments aren't just a marketing challenge for the **vaccine manufacturers**—they're a legal obstacle, too. Once a successful treatment for COVID-19 is established, it becomes much less likely that the FDA will grant Emergency Use Authorization (EUA) to new vaccines and new drugs. Under federal law, there **must be no approved alternative way** of treating or preventing a disease before authorizing an EUA.

The EUA under which the experimental vaccines were given to millions of Americans would never have been granted if COVID-19 was known to be an easily treatable disease.

In "The Real Anthony Fauci", Robert Kennedy writes, "His bizarre and inexplicable actions give credence to the suspicions held by many Americans that Dr. Fauci is working to **prolong the epidemic in order to impose expensive patented drugs and vaccines on a captive population.**"

HEALTH

# Patient who refused COVID vaccine was denied a heart transplant

January 26, 2022 · 8:55 PM ET

D.J.'s mother, Tracey Ferguson, insists that her son isn't against vaccinations, noting he's had other immunizations in the past. But the trained nurse said Wednesday that he's been diagnosed with atrial fibrillation – an irregular and often rapid heart rhythm – and that he has concerns about the side effects of the Covid-19 vaccine.

“D.J. is an informed patient,” Tracey Ferguson said in a brief interview at her home in Mendon, about 30 miles southwest of Boston. “He wants to be assured by his doctors that his condition would not be worse or fatal with this COVID vaccine.”

# Vaccine Refusers Don't Get to Dictate Terms Anymore

People who opt out of shots shouldn't expect their employers, health insurers, and fellow citizens to accommodate them.

By Juliette Kayyem

August 29, 2021

COVID vaccination is an objective, available, important, authenticated, and timely indicator of human behavior—albeit in a domain separate from motor vehicle traffic crashes. Whether COVID vaccination is associated with increased traffic risks, however, has not been tested and might seem surprising.<sup>18</sup> Simple immune activation against a coronavirus, for example, has no direct effect on traffic behavior or the risk of a motor vehicle crash.<sup>19</sup> Instead, we theorized that individual adults who tend to resist public health recommendations might also neglect basic road safety guidelines.<sup>20, 21, 22, 23</sup> The study question was “Does COVID vaccine hesitancy correlate with the risks of a serious traffic crash?”

## WHAT HAPPENED IN 1986?

- In 1986, Reagan passed a law that gave legal immunity to vaccine manufacturers.
- They could no longer be sued for injuries or death caused by their products. Safe vaccines wouldn't need such protection.
- Once that law passed, we suddenly 'needed' 48 additional doses of vaccines. (Do you remember any outbreaks in 1989?)
- Also, since that law was passed, U.S. Federal Government has paid out more than \$4 Billion in vaccine injury compensation, and that's only a fraction of actual injuries.
- The U.S. gives more vaccines than most developed countries, yet we have the sickest kids

## GUESS WHAT?

The CDC has only ever tested MMR and Thimerosal for a link to autism. The remaining 15 vaccines and 37 common ingredients remain untested for links to autism.

*Deputy Commissioner*

October 29, 2021

MEMORANDUM FOR: All CBP Supervisors  
FROM:   
Benjamin C. Hoffman  
Acting Deputy Commissioner  
SUBJECT: Vaccination Requirement

On September 9, President Biden signed [Executive Order \(EO\) 14043: Requiring Coronavirus Disease 2019 Vaccination for Federal Employees](#). The EO mandates that all federal employees be fully vaccinated by November 22, 2021, unless they receive an exemption for medical or religious reasons.

Pursuant to this requirement, all U.S. Customs and Border Protection (CBP) Supervisors are ordered to have a discussion with each of their employees (direct reports). During the discussions, CBP Supervisors are ordered to direct their employees to enter their vaccination status and upload their documentation if applicable in Vaccination Status System (VSS) by November 8, remind them that the failure to do so will represent a failure to follow instructions, which is separate from a failure to follow directions to be vaccinated, and advise them of the potential consequences of non-compliance. Supervisors shall also remind them of the President's direction to complete a vaccination protocol (i.e., receive the final vaccination shot) no later than November 8, so they are fully vaccinated by November 22. Failure to comply with the vaccination mandate will be a separate and distinct basis for potential discipline.

Supervisors who fail to have the required discussions with their employees will be subject to potential discipline for insubordination, up to removal from federal service.

CBP Supervisors must hold discussions with all employees (direct reports) NLT Wednesday, November 3, 2021. This includes employees in work and non-work (e.g., extended leave or other) status. Supervisors who are unable to have discussions with employees in a non-work status by November 3, 2021 must demonstrate attempt(s) made to reach the employee.

Attachment 1 includes discussion points supervisors must address when speaking to employees. Attachment 2 is the discussion log that supervisors are required to submit, per guidance from their respective Executive Assistant Commissioner (EAC), Assistant Commissioner (AC), or Chief, Border Patrol, with the names and duty locations of each employee and the dates on which each discussion was held or attempted to be held. The discussion log must be submitted NLT Thursday, November 4, 2021.

Actually reading through the literature describing what happens to people who experience these blood clots due to the Covid vaccines is horrifying.

"Thrombotic events included cerebral venous thrombosis (in 9 patients), splanchnic-vein thrombosis (in 3 patients), pulmonary embolism (in 3 patients), and other types of thrombi (in 4 patients); 5 of 10 patients had more than one thrombotic event. Included in this analysis is one patient who presented with fatal cerebral hemorrhage."

NEJM Writeup: [nejm.org/doi/full/10.1056/NEJMoa2104840](https://doi.org/10.1056/NEJMoa2104840)

The Atlantic also published a really good article discussing the different potential causes, including issues with platelets and/or the spike proteins.

Atlantic Article: [theatlantic.com/science/archive/2021/04/vacci...](https://theatlantic.com/science/archive/2021/04/vacci...)

These issues seem to be overwhelmingly affecting adult and middle-aged women. Furthermore, these vaccines were not designed for, or tested extensively on, immunocompromised or immunosuppressed individuals. The vast majority of studies were done on healthy individuals... and yet the first rounds of vaccines were emphasized for those who are the most vulnerable. Tell me how that makes sense??

Study to Describe the Safety, Tolerability, Immunogenicity, and Efficacy of RNA Vaccine Candidates Against COVID-19 in Healthy Individuals: [clinicaltrials.gov/ct2/show/NCT04368728](https://clinicaltrials.gov/ct2/show/NCT04368728)

Moderna Clinical Study Protocol:  
[modernatx.com/sites/default/files/mRNA-1273-P...](https://modernatx.com/sites/default/files/mRNA-1273-P...)

Some people born with genetic mutations that affect immune cells' ability to recognize and fight infection or who struggle to maintain strong responses (due to diet, cancers, or chemotherapies) are the ones being forced into the vaccine first.

Immunosuppression is also used intentionally. It can help people with autoimmune conditions, such as "rheumatoid arthritis, lupus, multiple sclerosis, and inflammatory bowel disease; organ-transplant recipients must take them, typically for the rest of their lives, to boost tolerance for unfamiliar tissue."

Link: [theatlantic.com/science/archive/2021/04/immun...](https://theatlantic.com/science/archive/2021/04/immun...)

Vaccines are designed for well-functioning immune cells. When they are introduced into a body where that is not the case, the results can be absolutely disastrous.

The monovalent Moderna and Pfizer-BioNTech COVID-19 vaccines are no longer authorized for use in the United States.

1988 The National Vaccine Injury Compensation Program (NVICP) was established to provide compensation following a vaccine-related adverse event that resulted in injury or death. NVICP was intended to serve as an alternative to civil litigation. The law established a Vaccine Injury Table that provided a list of compensable vaccination events and, for each, an associated time period requirement.

1986 The National Childhood Vaccine Injury Act of 1986 was enacted by Congress. The Department of Health and Human Services established the Vaccine Adverse Event Reporting System (VAERS), co-administered by FDA and CDC, to accept all reports of suspected adverse events, in all age groups, after the administration of any U.S.-licensed vaccine. The Act required healthcare providers and vaccine manufacturers to report to the Department of Health and Human Services specific adverse events following the administration of measles, mumps, rubella, polio, pertussis, diphtheria, and tetanus vaccine and any combinations thereof.

March 1993

A combined *Haemophilus influenzae* type b vaccine and whole cell DTP vaccine (Tetramune by Lederle/Praxis) was licensed.

Oct 16, 1990	Wyeth Lederle Vaccines voluntarily withdrew Rotashield from the market.
Fall 1990	A meningococcal group C conjugate vaccine was introduced into the routine schedule in the U.K. for infants, adolescents (15-17 yrs), and college entrants. A second phase was planned to begin in January 2000, subject to availability of vaccine.
Sept 1990	FDA approved a 2-dose schedule of hepatitis B vaccination for adolescents 11-15 years of age using Recombivax HB (Merck) with the 10 µg (adult) dose at 0 and 4-6 months later.
June 17, 1990	ACIP recommended exclusive use of inactivated poliovirus vaccine (IPV) for infants and children
1990	The Dale and Betty Bumpers Vaccine Research Center (VRC) was established at the National Institutes of Health to facilitate research in vaccine development. The primary focus of VRC research was to be the development of vaccines for AIDS.
1990	ACIP recommended DTaP vaccines for all five doses in the vaccination schedule, because local reactions, fever, and other systemic events were found to occur substantially less often after DTaP administration than after administration of whole cell DTP.
Aug 26, 1990	The Children's Vaccine Program was established at WHO's Program for Appropriate Technology in Health (PATH) with a \$125 million gift from the Bill and Melinda Gates Foundation. The program's goal was to provide vaccines to children in the developing world and to accelerate research and development of new vaccines. The first vaccines purchased were Hib, hepatitis B, rotavirus, and pneumococcal, which were not commonly used in the developing world.
Dec 21, 1990	Lyme Disease Vaccine (Recombinant OspA), (LYMERix by SmithKline Beecham) was licensed for use in persons ages 15 to 70 years. ACIP recommended that decisions on the use of the vaccine be made on the basis of assessment of individual risk, which included the extent of both person-tick contact and geographic risk. Just 3+ years later, on February 25, 2002, GlaxoSmithKline announced that the company would no longer manufacture or distribute LYMERix because of insufficient sales of the vaccine.

Them: you need a COVID vaccine to rejoin society & the NWO...

Me & my friends..

All of this can be yours if you  
**just get 2 vaccines**

## WARNING:

THIS PRODUCT IS AN EAR LOOP MASK. THIS PRODUCT IS NOT A RESPIRATOR AND WILL NOT PROVIDE ANY PROTECTION AGAINST COVID-19 (CORONAVIRUS) OR OTHER VIRUSES OR CONTAMINANTS.

Wearing an ear loop mask does not reduce the risk of contracting any disease or infection. User is solely responsible for the selection of appropriate personal protective equipment for the setting and application. Change immediately if contaminated.

- Made of Soft Material
- General Purpose Use Only
- Latex Free
- 50 Masks

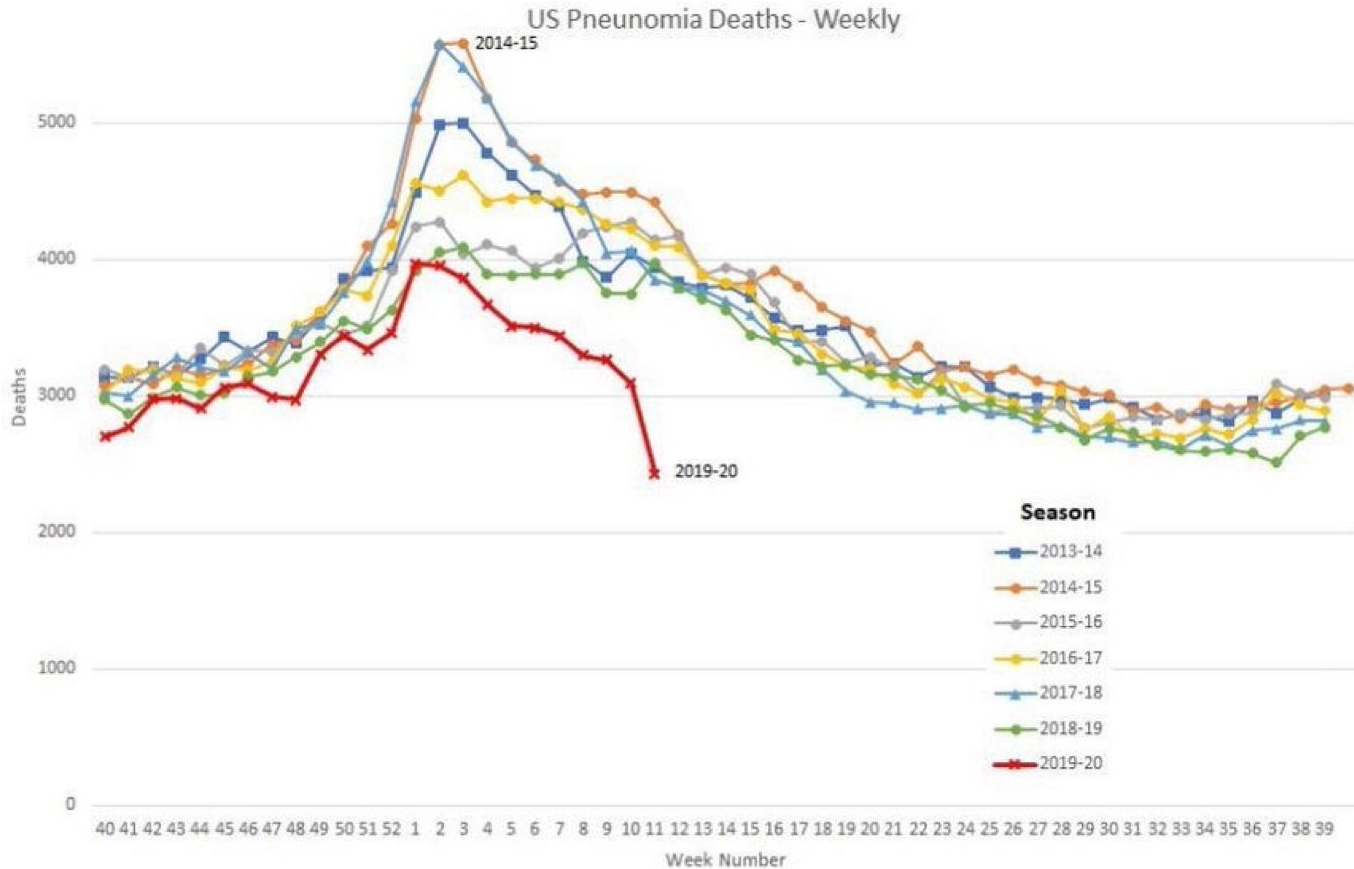

**This is the Mask needed  
to prevent Viruse inhalation and  
absorption through the eyes**

**This is a Mind Control Device  
part of a Pandemic PSYOP**

This is what virologists wear to protect themselves from a virus.

But don't worry....your bandana works too.

## Top Vaccine Inventors Give Out Stark Warnings On Bill Gates's Fast-Track COVID-19 Vaccine

**Dr. Paul Offit, Co-inventor of Rotavirus Vaccine**

**"I just worry in this era of panic here, that we, not we as researchers, but we as a public, would be willing to accept something that hadn't been thoroughly tested." [1]**

**Professor Ian Frazer, Co-inventor of HPV Vaccine**

**"immunisation with SARS corona vaccine caused, in animals, inflammation in the lungs which wouldn't otherwise have been there if the vaccine hadn't been given." [2]**

**Dr. Peter Hotez, Dean of the National School of Tropical Medicine at Baylor College of Medicine**

**"I understand the importance of accelerating timelines for vaccines in general, but from everything I know, this is not the vaccine to be doing it with" [3]**

Adenoviruses	Respiratory and eye infections
Herpesviruses	Cold sores, genital herpes, chickenpox, herpes zoster (shingles), glandular fever, congenital abnormalities (cytomegalovirus)
Poxviruses	Cowpox, smallpox (eradicated), molluscum contagiosum
Picornaviruses	Polio, viral hepatitis types A and B, respiratory infections, myocarditis
Togaviruses	Yellow fever, dengue, encephalitis
Orthomyxoviruses	Influenza
Paramyxoviruses	Mumps, measles, rubella
Coronaviruses	Common cold
Arenaviruses	Lassa fever

AMA Encyclopedia of Medicine, 1989, [Source](#)

### TYPES OF VIRUS

Family	Examples of conditions or diseases
Papovaviruses	Warts
Adenoviruses	Respiratory and eye infections
Herpesviruses	Cold sores, genital herpes, chickenpox, herpes zoster (shingles), glandular fever, congenital abnormalities (cytomegalovirus)
Poxviruses	Cowpox, smallpox (eradicated), molluscum contagiosum
Picornaviruses	Polio, viral hepatitis types A and B, respiratory infections, myocarditis
Togaviruses	Yellow fever, dengue, encephalitis
Orthomyxoviruses	Influenza
Paramyxoviruses	Mumps, measles, rubella
Coronaviruses	Common cold
Arenaviruses	Lassa fever
Rhabdoviruses	Rabies
Retroviruses	AIDS, degenerative brain diseases, and (possibly) various kinds of cancer

# OBEY SOCIAL DISTANCING

**BECAUSE FACIAL RECOGNITION SOFTWARE**

**DOESN'T WORK PROPERLY WHEN  
PEOPLE ARE CLOSE TO EACH OTHER**

# CLOTH MASKS

THE ILLUSION OF BEING PROTECTED

**CLOTH PORES:**  
11 MICROMETERS\*  
(Between 10-12 average)

**COVID PARTICLE:**  
100 NANOMETERS\*  
(Approximately)

NUMBER OF COVID PARTICLES THAT PASS THROUGH EACH PORE:

**STILL FEEL PROTECTED?**

# What Has President Trump Done?

Moved US Embassy to Jerusalem

Pulled out of the Trans Pacific Partnership

Signed an executive order to protect free speech on college campuses

Replaced NAFTA with USMCA Trade Agreement

Bolstered peace talks w/North Korea, resulting in US hostages released, multiple Kim Jong Un summits, Korean War US soldier remains returned, and credit from South Korea President Moon for peace talks between the Koreas

Destroyed ISIS Caliphate

Signed an executive order to protect religious freedom in 2017 and became the first president to hold a global religious freedom summit with the UN in 2019

Signed the Tax Cuts and Jobs Act into law, the largest US tax code overhaul in 30 years

Launched a project to eradicate HIV/AIDS from US by 2030, targeting high infection areas and getting drugs for people at risk

200 federal judges confirmed (as of Jul 2020), including two Supreme Court justices

Conducted military operations that killed ISIS leader Abu Bakr al-Baghdadi and Quasem Soleimani

256 miles of border wall completed (as of Jul 2020) and more on the way

Launched a mission to decriminalize homosexuality in nations where it's still punishable

Got Mexico to send 15,000 troops to the southern border to help stop illegal immigration in Jun 2019

Enacted a travel ban on nations identified by Obama's DHS as "countries of concern" to national security, periodically removing nations and adding others (such as North Korea and Venezuela) throughout his presidency as security needs change

Signed the First Step Act into law, a bipartisan prison reform initiative

Signed Music Modernization Act into law, allowing musicians to fairly receive royalties in the age of digital music streaming

Restored permanent funding for Historically Black Colleges via the Future Act

Signed the Great American Outdoors Act into law, green-lighting the largest US investment in national parks since WWII

Regulatory relief, cutting nearly 8 regulations for every 1 new regulation, surpassing original promise of cutting 2 for every 1

Saw a 3.9% unemployment rate in Jan 2020, the lowest of any president at the same point in office in recorded history

Pulled out of Paris Climate Accord, citing its economic disadvantage to US workers and lack of environment-protecting rules against leading polluters such as China

Saw a record jobs gain of 4.8 million in Jun 2020, the largest single month gain in US history and a continued 1.8 million jobs gain in Jul as the nation recovers from COVID-19

Reestablished the National Space Council, helping to make missions like the May 30, 2020 NASA/Space X launch possible

Signed 4 executive orders to lower prescription drug prices

Created the Space Force, the 6th branch of the US military

Provided \$35 million in grants for shelter and aid to human trafficking victims amid COVID-19 pandemic

Pulled out of the Iran Nuclear Deal

Refused the presidential salary, donating it to various causes including education, national parks, opioid addiction, and COVID-19 relief
